Chapter - 1 Vector Analysis **(1 - 1) to (1 - 46)**

1.1 Introduction ..... 1 - 2

1.2 Scalars and Vectors ..... 1 - 2

1.2.1 Scalar ..... 1 - 3

1.2.2 Vector ..... 1 - 3

1.2.3 Scalar Field ..... 1 - 3

1.2.4 Vector Field ..... 1 - 3

1.3 Representation of a Vector ..... 1 - 4

1.3.1 Unit Vector ..... 1 - 4

1.4 Vector Algebra ..... 1 - 5

1.4.1 Scaling of Vector ..... 1 - 5

1.4.2 Addition of Vectors ..... 1 - 5

1.4.3 Subtraction of Vectors ..... 1 - 7

1.4.3.1 Identical Vectors ..... 1 - 7

1.5 The Co-ordinate Systems ..... 1 - 7

1.6 Cartesian Co-ordinate System ..... 1 - 8

1.6.1 Representing a Point in Rectangular Co-ordinate System ..... 1 - 9

1.6.2 Base Vectors (Unit Vectors) ..... 1 - 10

1.6.3 Position and Distance Vectors ..... 1 - 10

1.6.4 Differential Elements in Cartesian Co-ordinate System ..... 1 - 12

1.7 Cylindrical Co-ordinate System ..... 1 - 15

1.7.1 Base Vectors (Unit Vectors) ..... 1 - 17

1.7.2 Differential Elements in Cylindrical Co-ordinate System ..... 1 - 18

1.7.3 Relationship between Cartesian and Cylindrical Systems ..... 1 - 19

1.8 Spherical Co-ordinate System ..... 1 - 21

1.8.1 Base Vectors (Unit Vectors) ..... 1 - 24

1.8.2 Differential Elements in Spherical Co-ordinate System ..... 1 - 24

Scanned with OKEN Scanner

1.8.3 Relationship between Cartesian and Spherical Systems ..... 1 - 26
1.9 Vector Multiplication ..... 1 - 28
1.10 Scalar or Dot Product of Vectors ..... 1 - 28
1.10.1 Properties of Dot Product ..... 1 - 28
1.10.2 Applications of Dot Product ..... 1 - 29
1.11 Vector or Cross Product of Vectors ..... 1 - 31
1.11.1 Properties of Cross Product ..... 1 - 32
1.11.2 Applications of Cross Product ..... 1 - 34
1.12Products of Three Vectors ..... 1 - 36
1.12.1 Scalar Triple Product ..... 1 - 36
1.12.1.1 Characteristics of Scalar Triple Product ..... 1 - 36
1.12.2 Vector Triple Product ..... 1 - 37
1.12.2.1 Characteristics of Vector Triple Product ..... 1 - 37
1.13 Transformation of Vectors ..... 1 - 37
1.13.1 Transformation of Vectors from Cartesian to Cylindrical ..... 1 - 38
1.13.2 Transformation of Vectors from Cylindrical to Cartesian ..... 1 - 39
1.13.3 Transformation of Vectors from Cartesian to Spherical ..... 1 - 40
1.13.4 Transformation of Vectors from Spherical to Cartesian ..... 1 - 41
1.13.5 Distances in all Co-ordinate Systems ..... 1 - 42
1.13.6 Transformation of Vectors from Spherical to Cylindrical ..... 1 - 43
1.13.7 Transformation of Vectors from Cylindrical to Spherical ..... 1 - 43

Chapter - 2 Coulomb's Law and Electric Field Intensity (2 - 1) to (2 - 58)

2.1 Introduction ..... 2 - 2
2.2 Coulomb's Law ..... 2 - 2
2.2.1 Statement of Coulomb's Law ..... 2 - 3
2.2.1.1 Constant of Proportionality (k) ..... 2 - 3
2.2.2 Vector Form of Coulomb's Law ..... 2 - 4
2.2.3 Principle of Superposition ..... 2 - 5
2.2.4 Steps to Solve Problems on Coulomb's Law ..... 2 - 6
2.3 Electric Field Intensity ..... 2 - 13
2.3.1 Units of $\bar{E}$ ..... 2 - 14

2.3.2 Method of Obtaining $\overline{E}$ in Cartesian System ..... 2 - 15
2.3.3 Electric Field due to Discrete Charges ..... 2 - 16
2.3.4 Important Observations ..... 2 - 16
2.4 Types of Charge Distributions ..... 2 - 24
2.4.1 Point Charge ..... 2 - 25
2.4.2 Line Charge ..... 2 - 25
2.4.2.1 Method of Finding Q from ρ_L ..... 2 - 25
2.4.3 Surface Charge ..... 2 - 26
2.4.3.1 Method of Finding Q from ρ_S ..... 2 - 27
2.4.4 Volume Charge ..... 2 - 27
2.4.4.1 Method of Finding Q from ρ_v ..... 2 - 27
2.5 Electric Field Intensity due to Various Charge Distributions ..... 2 - 29
2.5.1 $\overline{E}$ due to Line Charge ..... 2 - 30
2.5.2 $\overline{E}$ due to Surface Charge ..... 2 - 30
2.5.3 $\overline{E}$ due to Volume Charge ..... 2 - 31
2.6 Electric Field due to Infinite Line Charge ..... 2 - 31
2.7 Electric Field due to Charged Circular Ring ..... 2 - 43
2.8 Electric Field due to Infinite Sheet of Charge ..... 2 - 48

Chapter - 3 Electric Flux Density, Gauss's Law and Divergence **(3 - 1) to (3 - 70)**

3.1 Introduction ..... 3 - 2
3.2 Electric Flux ..... 3 - 2
3.2.1 Properties of Flux Lines ..... 3 - 2
3.3 Electric Flux Density ($\overline{D}$) ..... 3 - 3
3.3.1 Vector Form of Electric Flux Density ..... 3 - 4
3.4 $\overline{D}$ due to a Point Charge Q ..... 3 - 5
3.5 Relationship between $\overline{D}$ and $\overline{E}$ ..... 3 - 5
3.6 Electric Flux Density for Various Charge Distributions ..... 3 - 6
3.6.1 Line Charge ..... 3 - 6
3.6.2 Surface Charge ..... 3 - 7
3.6.3 Volume Charge ..... 3 - 7

Scanned with OKEN Scanner

3.7 Gauss's Law ..... 3 - 13
3.7.1 Mathematical Representation of Gauss's Law ..... 3 - 13
3.7.2 Special Gaussian Surfaces ..... 3 - 16
3.7.3 Limitations of Gauss's Law ..... 3 - 16
3.8 Applications of Gauss's Law ..... 3 - 19
3.8.1 Point Charge (Proof of Gauss's Law) ..... 3 - 19
3.8.1.1 Use of Gauss's Law to Obtain $\bar{D}$ and $\bar{E}$ ..... 3 - 21
3.8.2 Infinite Line Charge ..... 3 - 22
3.8.3 Coaxial Cable ..... 3 - 24
3.8.4 Infinite Sheet of Charge ..... 3 - 25
3.8.5 Spherical Shell of Charge ..... 3 - 27
3.8.5.1 Variation of $\bar{E}$ Against r. ..... 3 - 29
3.8.6 Uniformly Charged Sphere ..... 3 - 29
3.8.6.1 Variation of $\bar{E}$ against r. ..... 3 - 31
3.9 Gauss's Law Applied to Differential Volume Element ..... 3 - 43
3.10 Divergence ..... 3 - 47
3.10.1 Physical Meaning of Divergence ..... 3 - 47
3.10.2 The Vector Operator ∇ ..... 3 - 49
3.10.3 Divergence in Different Coordinate Systems ..... 3 - 50
3.10.4 Properties of Divergence of Vector Field ..... 3 - 50
3.11 Maxwell's First Equation ..... 3 - 51
3.12 Divergence Theorem ..... 3 - 60
3.12.1 Proof of Divergence Theorem ..... 3 - 62

Chapter - 4 Electric Work, Energy and Potential (4 - 1) to (4 - 62)

4.1 Introduction ..... 4 - 2
4.2 Work Done ..... 4 - 2
4.3 The Line Integral ..... 4 - 4
4.3.1 Important Comments About Work Done ..... 4 - 6
4.4 Potential Difference ..... 4 - 13
4.4.1 Unit of Potential Difference ..... 4 - 13

Scanned with OKEN Scanner

4.5 Potential due to Point Charge ..... 4 - 14
4.5.1 Concept of Absolute Potential ..... 4 - 15
4.5.2 Potential due to Point Charge Not at Origin ..... 4 - 17
4.5.3 Potential due to Several Point Charges ..... 4 - 17
4.5.4 Potential Calculation When Reference is Other Than Infinity ..... 4 - 20
4.6 Potential due to a Line Charge ..... 4 - 25
4.7 Potential due to Surface Charge ..... 4 - 28
4.8 Potential due to Volume Charge ..... 4 - 31
4.9 Potential Difference due to Infinite Line Charge ..... 4 - 32
4.10 Equipotential Surfaces ..... 4 - 37
4.11 Conservative Field ..... 4 - 39
4.12 Potential Gradient ..... 4 - 39
4.12.1 Relation between $\overline{E}$ and V ..... 4 - 40
4.12.2 The Vector Operator ∇ (del) ..... 4 - 42
4.12.3 Properties of Gradient of a Scalar ..... 4 - 43
4.13 Energy Density in the Electrostatic Fields ..... 4 - 48
4.13.1 Energy Stored interms of $\overline{D}$ and $\overline{E}$ ..... 4 - 50
4.14 An Electric Dipole ..... 4 - 57
4.14.1 Expression of $\overline{E}$ due to an Electric Dipole ..... 4 - 58
4.14.2 Dipole Moment ..... 4 - 59

Chapter - 5 Conductors, Dielectrics and Capacitance (5 - 1) to (5 - 66)

5.1 Introduction ..... 5 - 2
5.2 Current and Current Density ..... 5 - 2
5.2.1 Relation between I and $\overline{J}$ ..... 5 - 3
5.2.2 Relation between $\overline{J}$ and ρ_v ..... 5 - 4
5.3 Continuity Equation ..... 5 - 6
5.3.1 Steady Current ..... 5 - 7
5.4 Conductors ..... 5 - 12
5.4.1 Point Form of Ohm's Law ..... 5 - 13

Scanned with OKEN Scanner

5.4.2 Resistance of a Conductor ..... 5 - 13
5.4.3 Properties of Conductor ..... 5 - 15
5.5 Relaxation Time ..... 5 - 18
5.6 Dielectric Materials ..... 5 - 20
5.6.1 Polarization ..... 5 - 20
5.6.2 Mathematical Expression for Polarization ..... 5 - 21
5.6.3 Properties of Dielectric Materials ..... 5 - 23
5.6.4 Dielectric Strength ..... 5 - 23
5.7 Boundary Conditions ..... 5 - 25
5.8 Boundary Conditions between Conductor and Free Space ..... 5 - 25
5.8.1 $\overline{E}$ at the Boundary ..... 5 - 26
5.8.2 D_N at the Boundary ..... 5 - 28
5.8.3 Boundary Conditions between Conductor and Dielectric ..... 5 - 30
5.9 Boundary Conditions between Two Perfect Dielectrics ..... 5 - 31
5.9.1 Refraction of $\overline{D}$ at the Boundary ..... 5 - 34
5.10 Concept of Capacitance ..... 5 - 42
5.11 Capacitors in Series ..... 5 - 43
5.12 Capacitors in Parallel ..... 5 - 44
5.13 Parallel Plate Capacitor ..... 5 - 45
5.14 Capacitance of a Co-axial Cable ..... 5 - 50
5.15 Spherical Capacitor ..... 5 - 51
5.15.1 Capacitance of Single Isolated Sphere ..... 5 - 52
5.15.2 Isolated Sphere Coated with Dielectric ..... 5 - 52
5.16 Composite Parallel Plate Capacitor ..... 5 - 56
5.16.1 Dielectric Boundary Normal to the Plates ..... 5 - 58
5.17 Energy Stored in a Capacitor ..... 5 - 63
5.17.1 Energy Density ..... 5 - 64

Chapter - 6 Poisson's and Laplace's Equations (6 - 1) to (6 - 38)

6.1 Introduction ..... 6 - 2
6.2 Poisson's and Laplace's Equations ..... 6 - 2

Scanned with OKEN Scanner

6.2.1 ∇^2 Operation in Different Co-ordinate Systems ..... 6 - 3
6.3 Uniqueness Theorem ..... 6 - 7
6.4 Procedure for Solving Laplace's Equation ..... 6 - 9
6.5 Calculating Capacitance using Laplace's Equation ..... 6 - 23
6.6 Product Solution of Laplace's Equation ..... 6 - 32
6.6.1 Cartesian Co-ordinate System ..... 6 - 32
6.6.2 Cylindrical Co-ordinate System ..... 6 - 34
6.6.3 Spherical Co-ordinate System ..... 6 - 35

Chapter - 7 Steady Magnetic Field (7 - 1) to (7 - 76)

7.1 Introduction ..... 7 - 2
7.2 Magnetic Field and its Properties ..... 7 - 2
7.2.1 Magnetic Field due to Current Carrying Conductor ..... 7 - 3
7.2.2 Magnetic Field Intensity ..... 7 - 4
7.2.3 Magnetic Flux Density ..... 7 - 5
7.2.4 Relation between $\overline{B}$ and $\overline{H}$ ..... 7 - 5
7.3 Biot-Savart Law ..... 7 - 5
7.3.1 Biot-Savart Law Interms of Distributed Sources ..... 7 - 8
7.4 $\overline{H}$ due to Infinitely Long Straight Conductor ..... 7 - 10
7.5 $\overline{H}$ due to Straight Conductor of Finite Length ..... 7 - 13
7.5.1 Sign Convention for α_1 and α_2 ..... 7 - 14
7.6 $\overline{H}$ at the Centre of a Circular Conductor ..... 7 - 25
7.7 $\overline{H}$ on the Axis of a Circular Loop ..... 7 - 27
7.8 Ampere's Circuital Law ..... 7 - 30
7.8.1 Proof of Ampere's Circuital Law ..... 7 - 31
7.8.2 Steps to Apply Ampere's Circuital Law ..... 7 - 31
7.9 Applications of Ampere's Circuital Law ..... 7 - 32
7.9.1 $\overline{H}$ due to Infinitely Long Straight Conductor ..... 7 - 32
7.9.2 $\overline{H}$ due to a Co-axial Cable ..... 7 - 33
7.9.3 $\overline{H}$ due to Infinite Sheet of Current ..... 7 - 36

Scanned with OKEN Scanner

7.10 Curl ..... 7 - 44
7.10.1 Curl in Various Co-ordinate Systems ..... 7 - 47
7.10.2 Properties of Curl ..... 7 - 48
7.10.3 Physical Significance of a Curl ..... 7 - 48
7.10.3.1 Types of Fields ..... 7 - 49
7.11 Stoke's Theorem ..... 7 - 54
7.11.1 Proof of Stoke's Theorem ..... 7 - 54
7.12 Magnetic Flux and Flux Density ..... 7 - 61
7.12.1 Maxwell's Equations for Static Electromagnetic Fields ..... 7 - 62
7.12.2 Application of Flux Density and Flux to Co-axial Cable ..... 7 - 62
7.13 Magnetic Scalar and Vector Potentials ..... 7 - 67
7.13.1 Scalar Magnetic Potential ..... 7 - 67
7.13.2 Laplace's Equation for Scalar Magnetic Potential ..... 7 - 68
7.13.3 Vector Magnetic Potential ..... 7 - 68
7.13.4 Poisson's Equation for Magnetic Field ..... 7 - 69
7.13.5 $\bar{A}$ due to Differential Current Element ..... 7 - 69

Chapter - 8 Magnetic Forces (8 - 1) to (8 - 36)

8.1 Introduction ..... 8 - 2
8.2 Force on a Moving Point Charge ..... 8 - 2
8.3 Force on a Differential Current Element ..... 8 - 10
8.4 Force between Differential Current Elements ..... 8 - 14
8.4.1 Force between Two Parallel Conductors ..... 8 - 16
8.5 Magnetic Torque and Magnetic Dipole Moment ..... 8 - 19
8.5.1 Magnetic Moment of a Planar Coil ..... 8 - 20
8.5.2 Magnetic Dipole Moment ..... 8 - 23
8.5.3 Magnetic Dipole ..... 8 - 23

Chapter - 9 Magnetic Materials (9 - 1) to (9 - 36)

9.1 Introduction ..... 9 - 2
9.2 Nature of Magnetic Materials ..... 9 - 2

Scanned with OKEN Scanner

9.2.1 Origin of Magnetic Dipole Moment in the Material ..... 9 - 2
9.2.2 Classification of Magnetic Materials ..... 9 - 3
9.3 Magnetization and Permeability ..... 9 - 7
9.4 Magnetic Boundary Conditions ..... 9 - 13
9.4.1 Boundary Conditions for Normal Component ..... 9 - 14
9.4.2 Boundary Conditions for Tangential Component ..... 9 - 16
9.5 Magnetic Circuits ..... 9 - 25
9.6 Magnetic Energy - Energy Stored in a Magnetic Field ..... 9 - 33
9.7 Forces on Magnetic Materials ..... 9 - 36

Chapter - 10 Time Varying Fields and Maxwell's Equations **(10 - 1) to (10 - 50)**

10.1 Introduction ..... 10 - 2
10.2 Faraday's Law and Lenz's Law ..... 10 - 2
10.2.1 A Stationary Closed Path in a Time Varying $\overline{B}$ Field Statically Induced E.M.F. ..... 10 - 4
10.2.2 A Moving Closed Path in Static $\overline{B}$ Field Dynamically Induced E.M.F. ..... 10 - 5
10.2.3 Moving Closed Path in a Time Varying $\overline{B}$ Field ..... 10 - 6
10.2.4 Faraday's Disc Generator ..... 10 - 6
10.3 Displacement Current Density and Displacement Current ..... 10 - 15
10.3.1 Physical Significance of Displacement Current ..... 10 - 16
10.4 General Field Relations for Time Varying Fields ..... 10 - 27
10.4.1 Equation of Continuity for Time Varying Fields ..... 10 - 27
10.4.2 Inconsistance of Ampere's Circuit Law-Modification in Equation of Continuity ..... 10 - 29
10.5 Maxwell's Equations ..... 10 - 31
10.5.1 Maxwell's Equations for Static Fields ..... 10 - 31
10.5.2 Maxwell's Equations for Time Varying Fields ..... 10 - 34
10.5.2.1 Maxwell's Equations for Free Space ..... 10 - 37
10.5.2.2 Maxwell's Equations for Good Conductor ..... 10 - 38
10.5.2.3 Maxwell's Equations for Harmonically Varying Fields ..... 10 - 38
10.6 Boundary Conditions for Time Varying Fields ..... 10 - 49

Scanned with OKEN Scanner

40 2 questions life.

Chapter - 11 Uniform Plane Waves (11 - 1) to (11 - 72)

11.1 Introduction ..... 11 - 2

11.2 General Wave Equations ..... 11 - 3

11.3 Uniform Plane Waves in Free Space ..... 11 - 5

11.3.1 Phase Velocity ..... 11 - 9

11.3.2 Relationship between $\overline{E}$ and $\overline{H}$ in Free Space ..... 11 - 10

11.3.3 Propagation Constant (γ) ..... 11 - 13

11.3.4 Wavelength (λ) ..... 11 - 15

11.4 Electromagnetic Wave Equations in Phasor Form ..... 11 - 22

11.5 Electromagnetic Wave in Perfect Dielectric ..... 11 - 26

11.6 Electromagnetic Waves in Lossy Dieletric ..... 11 - 34

11.6.1 niform Plane Wave in Practical Dielectric ..... 11 - 39

11.7 Electromagnetic Waves in Good Conductor ..... 11 - 44

11.8 Poynting Vector and Poynting Theorem. ..... 11 - 53

11.8.1 Average Power Density (P_{avg}) ..... 11 - 55

11.8.2 Integral and Point Forms of Poynting Theorem ..... 11 - 56

11.8.3 Power Flow in Co-axial Cable ..... 11 - 58

11.8.4 Instantaneous, Average and Complex Poynting Vector ..... 11 - 60

11.8.5 Power Loss in a Plane Conductor ..... 11 - 61

Scanned with OKEN Scanner
